--	---

New iPad® and iPad® 2 installation

- Power on the keyboard with power switch. The power and Bluetooth® LED indicators will light for 5 seconds and powered off.
- Enable Bluetooth® function on your New iPad® or iPad® 2.
- Press Connect Bluetooth® button on the keyboard.
- Select **Mobile Bluetooth Keyboard** on your New iPad® or iPad® 2.
- Your New iPad® or iPad® 2 will display a security code.
- Type the security code on the Bluetooth® keyboard and press **Enter**.
- Wireless keyboard is successfully connected and ready to use.

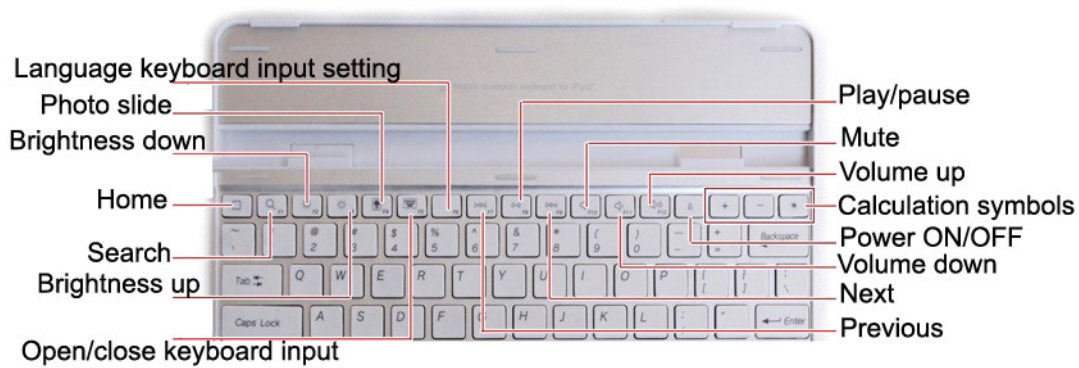

Windows computer, tablet and smartphone hardware installation

- Power on the Bluetooth® keyboard.
- Enable Bluetooth® function on your computer or smartphone or tablet and search for new Bluetooth® device.
- Select **Mobile Bluetooth® keyboard** in the list of devices detected. This will launch pairing process.
- Then you will have a window about how to pair Bluetooth® device. A security code will be given.
- Enter the security code on the Bluetooth® keyboard to pair it with your computer or smartphone or tablet

* Sometimes, no security code is given. You can input any one you want, like **0000**.

The most important thing for pairing is to entering the same code on the keyboard and on your PC/smartphone/tablet.

- The Windows system will install Bluetooth® driver. Then click on **Close** once the keyboard has been successfully paired with your computer.
- The smartphone/tablet will search and automatically detect the keyboard. Some smartphone and tablet might not be compatible with the Bluetooth® keyboard.

Battery charge

When the battery power is low, the Power LED indicator will start blinking. It is time to recharge the keyboard.

Connect the USB mini 5 pins power cable to keyboard and the other edge to your computer.

The power LED indicator will light on when the keyboard is charging. It takes up to 5 hours to complete a full charge. Once the charge is finished, the Power LED indicator will turn off.

Sleep mode

The keyboard will be into sleep mode whenever it is inactive for 15 minutes. The power LED indicator will turn off. To escape from sleep mode, just press any key and wait for 3 seconds. The keyboard will power on and be ready to use.

Troubleshooting

- The operating distance between 2 Bluetooth® devices can theoretically reach up to 10 meters under certain conditions (in open space without any obstacle, without interference, in straight line).
- If you can not pair the keyboard, check that power switch is ON, that operating distance is less than 10 meters, that battery is fully charged, that Bluetooth® function is enabled.
