Battery and Charging Notice

- The speaker BT040 has built-in rechargeable battery. A normal charging process takes about 3 hours. The red LED will turn on when charging and will turn off when charging finished. You can not continue to use the speaker during the charge. Use the delivered USB cable to connect one end to the speaker (micro USB plug) and the other end to USB computer plug
- Please make sure the battery has been fully charged and fully released at the beginning of use to ensure the battery the best performance
- Always use delivered USB power cable to charge the speaker. Using any incorrect power supply cable can cause damage and void the warranty
- After finished charging, please pull out the cable from the speakers and from the computer
- Do not put the speaker in charging state for a long time. This will shorten the lifetime of the battery

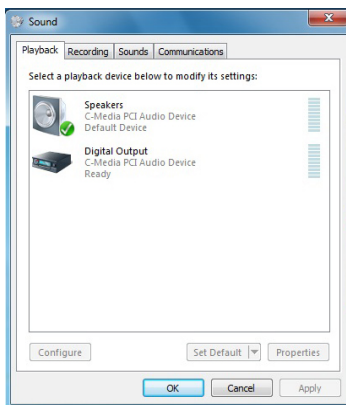

Trouble shooting

If disconnection occurs, please check the following factors:

- Ensure that the speaker has enough power, is turned on and has been successfully paired to the Bluetooth peripheral
- Bluetooth function of Bluetooth peripheral is enabled
- Bluetooth peripheral must support A2DP and AVRCP standard

If you have no sound with your Android device, check that you have enable Audio in device settings.

In you computer system, check that you have checked the speakers case as shown below :
